Back Up All Databases For Complete File Security

Microsoft SQL is an application that allows users to create a variety of different databases for files within the Microsoft Office family. These databases are filled with important files that should be backed up using a [third party, offsite backup vendor](#) for 100% file security.

Just putting MS files into an MS SQL database won't keep them safe. A computer virus, an office fire or even just a plain old accidental overwrite can wipe out a file or an entire database. [TAPNET's complete file backup system](#) includes the automatic online backup of Microsoft SQL databases.

TAPNET's [MS SQL online backup capabilities](#) mean that your MS SQL databases will automatically be saved on a daily, weekly, and monthly basis. You will create a password that will give you access to all of your files through the TAPNET website. In the event of data loss, simply log into your account using your password and initiate a download.

In a matter of minutes (depending on the download speed of your computer), all of your files, including your MS SQL files will be back. With TAPNET's MS SQL online backup, your business will never have to suffer the permanent loss of your MS SQL databases. Such a loss would certainly be devastating to any business and could even lead to business losses or failure.

To learn more about [TAPNET's data backup plans](#) or how they can provide online backup services for your MS SQL databases, [call a knowledgeable operator](#) today.
