Get Everything Back – Bare Metal Incremental Backup

There's a lot more on your computer than just files. You've got expensive software, downloads, technology patches, special settings and your computer's operating system that are all an integral part of your full computer environment.

So, what happens to all these important features if your computer is lost, stolen or destroyed? Sure, you can get your files back, but will you be able to use them without the coinciding software, settings and operating system? In other words, how will you work on your big client's PPT presentation if you don't have Microsoft PPT installed on your computer?

TAPNET offers a solution with its [Bare Metal Incremental Backup](#) capabilities. Supporting ShadowProtect's image-based backup system, TAPNET is able to provide clients with a [full scale backup of their entire production environment](#). Bare metal means we can rebuild your full operating system from scratch.

The Bare Metal Incremental Backup capability allows you and your team to be completely operational in minutes. In a world that demands instant results, you can't afford to be down for even a short period of time or slowed by the need to purchase and load on new software, redo all of your important settings and download the patches and applications you need to function. Think of the time, money and frustration a Bare Metal Incremental Backup service could save.

Bare Metal Incremental Backups allow for [rapid recovery of data](#) to dissimilar hardware and from or to virtual disks. As an administrator, you retain centralized control over your backups through a simple management interface. You'll also have access to VirtualBoot technology for failover to a virtual desktop. This technology will also allow you to convert backup images into virtual machines. The converter tool works for .VHD or .VMDK files.

The Bare Metal Incremental Backup will work for almost any system, including SQL, Exchange and other important applications.

[Call a TAPNET operator today](#) to learn more about how a Bare Metal Incremental Backup plan can provide you with the safest, most secure and most complete [computer backup protection](#) available.
