# **Need All Your Data On Your iPad or iPhone? Yep, There's An App For That**

We live in an iWorld.

Music? iPod.

Phone? iPhone.

Computer? iPad.

[Data storage](#)? Well, you still need TAPNET for that, but don't worry. With TAPNET's new [mobile viewer app](#), you can now stay in touch with all of your computer data from your iPad and/or iPhone.

Both the iPhone and iPad are nifty technological innovations, but neither has been able to completely replace the computer. Most of us still use laptops and desktops to perform business and personal tasks and to store large files.

It can be a drag when you're away from your computer and find yourself in sudden need of an important document, presentation, or other file that's sitting on your hard drive. Well, if you happen to have an iPhone in your pocket or an iPad in your briefcase, then you can have access to all your files.

[TAPNET's briefcase backup](#) service automatically uploads a customer's computer data to TAPNET's servers, allowing the customer the ability to access his or her files online from any computer at any location. This powerful capability is now available on the iPad and iPhone using TAPNET's [mobile viewer app](#). This means with a few touch strokes, an iPad or iPhone owner can watch their favorite movies, listen to their playlists and access any of their Microsoft Office documents from the web as long as they have an Internet connection.

Not only does TAPNET's mobile viewer app allow customers to [access their computer data from their iPad or iPhone](#), it can also be used to save iPad and iPhone data. For instance, iPhone pictures can be easily and safely uploaded for later access from a different computer platform. This beats downloading photos manually.

So, if you crave complete connection between your iPhone, iPad and the data you generate on your work and home computers, consider TAPNET's mobile viewer app and its [briefcase backup services](#). Did we mention it's Free for 30 days? [Start your trial now](#).
