Risky Business – Back Up Your Files or You Could be Putting Your Business on the Line

Any entrepreneur knows that to start a business, you've got to invest in the right assets. This means dishing out the dollars for the right location, the right equipment and the right people. Getting the best for your business can cost big bucks, but it's worth the cost to achieve success.

That's why it's amazing then that a relatively small investment can have a huge impact in protecting your business from disaster and maybe even from failure.

A business runs on data, we're talking emails, policy documents, project initiation forms, tradeshow calendars, technology specs, invoices and much, much more. Without this data, business as usual would grind to a halt. Why is it then, that so many businesses fail to adequately [back up computer data](#)?

A data loss event such as a fire, a malicious virus or theft could wipe out a business's entire data history, leaving it scrambling to rebuild. It's no surprise that a massive data loss event is one of the most common reasons for business failure.

The solution is simple (it's even in the name). TAPNET Solutions offers an [unlimited online backup plan](#) starting at \$3.75 per month. This means that a business can back up all of its data in a secure, offsite location. In the event of a data loss event, an administrator can gain easy access to all the business's backup files directly from TAPNET's website and be up and running in minutes.

TAPNET's unlimited online backup plan is safe and extremely easy to use. Their program will automatically upload your data on a daily, weekly, monthly or yearly basis, so you won't even have to think about it. You'll just get to enjoy the peace of mind of knowing that your data is safe.

How does TAPNET's unlimited online backup plan work? Once you sign up, TAPNET will initiate an upload of all your business data. This can be done for a single computer or multiple computers. Your information will be encrypted before it leaves your computer so that no one, not even TAPNET employees, will see your private business information. Your data will then be stored on TAPNET's servers in a safe and secure environment.

On a regular basis, TAPNET's program will automatically update your data, saving all your recent changes so that whenever you need it, your data will be available.

A business owner faces a myriad of difficult decisions each and every day. [Backing up computer data](#) is not one of them. TAPNET's unlimited online backup plan is a simple, cost effective solution to protecting your data and your business.
